

Saule Technologies is looking for a:

Patent Engineer

Based in our Wroclaw office and research centre (Poland)

Summary: As a Patent Engineer, you would be responsible for evaluating the patentability of innovations. Prepare, draft and support with filing patent applications. Work closely with attorneys and different business teams. Perform research, analysis, and provide guidance on a variety of patent and IP-related issues.

Duties:

- help inventors and R&D with every aspect of the patent process,
- research other similar inventions and patents,
- write patent applications with an eye toward anticipating any questions or objections the patent examiner might have,
- prepare responses to reports from patent examiners,
- ensure application and renewal deadlines are met.

Education and Training Requirements:

- Completed Master's degree in natural sciences,
 - Background in materials science, chemistry or physics will be highly appreciated,
- Prior experience with Intellectual Property,
 - Patent document preparation,
 - Understanding the fundamental differences between IP assets,
- Excellent command of written and spoken English language (C1 or higher),
- Creativity and open mindset,
- Good skills in problem solving and working independently.

What we offer:

- A competitive salary, benefits, private healthcare, bonuses and incentive programmes, support with relocation,
- Supporting the career path towards becoming a European Patent Attorney,
- A young, dynamic, international team with a great work atmosphere,
- Participation in the history of perovskite commercialization,
- A broad range of development opportunities.
